## Online Photo Albums

---

Do any of you folks keep or maintain an online photo album like photo-bucket?

They are lots of fun and a handy ways to share video and photos with friends and family!

Nice thing is, you can keep them somewhat private for family members to access behind a password and the compression quality for photography and video is much better than You tube.

Dan

Hi Dan!

I have used photobucket several year ago, but now I am using gmail photo album. Since I use gmail, it's photo album is very convenient, and it allows access control as well.
